

CROUCHING TIGER

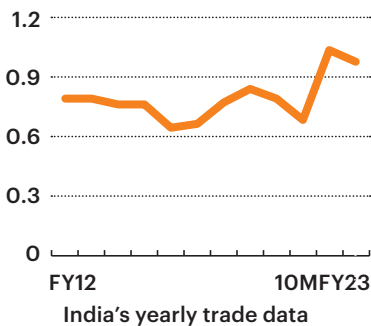

India's total trade—combining exports and imports—is set to surpass the \$1-trillion mark for the second consecutive financial year in FY23. While the country's international trade jumped 30 per cent from FY12 to FY22, imports and exports grew 25 per cent and 38 per cent, respectively, albeit imports are still about 45 per cent higher than exports. However, the country's reliance on certain nations has increased for both imports and exports. Any slowdown in these economies may hit India's trade disproportionately. Here's what the numbers have to say

SET FOR A TRILLION

Like FY22, India's total trade this year (10MFY23) has surpassed the past 10-year average of \$0.78 trillion

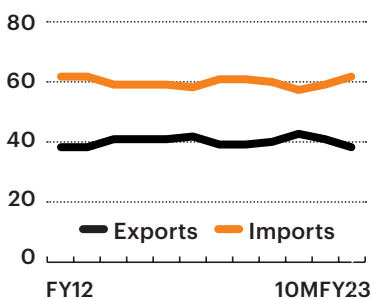

TOTAL TRADE (\$ TRILLION)

STATUS QUO

Despite rising trade, the ratio between exports and imports has remained largely the same in the past 12 years

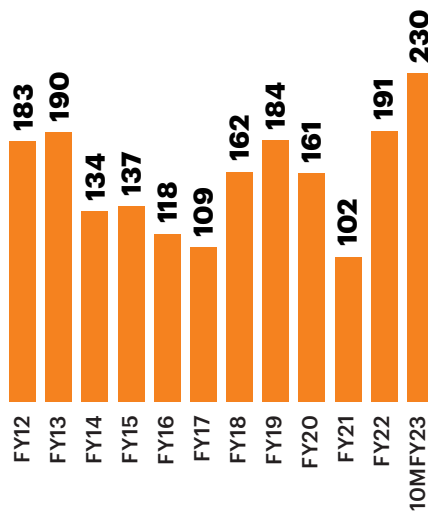

SHARE IN TOTAL TRADE (%)

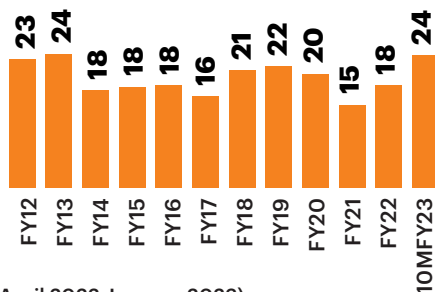

A TROUBLING TRAJECTORY

India's trade deficit—the difference between exports and imports—has crossed \$200 billion in the April 2022-January 2023 period

TRADE DEFICIT (\$ BILLION)

DEFICIT AS A PERCENTAGE OF TOTAL TRADE (%)

387 PER CENT

The surge in total imports from Russia to \$37.55 billion in April 2022-January 2023 compared to \$7.71 billion in the year-ago period

10MFY23: First 10 months of FY23 (April 2022-January 2023)
