

TEXTS YOU CAN TRUST

The humble SMS or text message is a powerful weapon in the hands of phishers. It results in not just financial losses for customers, but also loss of reputation for telcos. To help telcos avoid such situations, Hyderabad-based cloud communications firm

AI-powered Tanla Wisely ATP keeps customers safe from phishing texts

Tanla has unveiled Wisely ATP, an AI-powered anti-phishing tool that evaluates an SMS, including the sender, message body, and CTA (call to action) to identify if the text message has been sent as phishing bait. If it determines the SMS to be phishing bait, it informs the telco and blocks the message. All this happens in just 20 milliseconds and is over 99 per cent accurate!

NOT JUST MOBILES

There is more to the Mobile World Congress, one of the biggest tech shows of the year, than just smartphones. Here's a glimpse of some interesting stuff seen this year
