

“Providing Advanced Healthcare at affordable costs”

This vision has guided us to build a 264 bedded hospital with modern infrastructure and a team of around highly qualified doctors on our panel. Our Doctors share amongst themselves decades of experience and enjoy the trust of the patients and their families.

Whether it is a routine health checkup for individuals or family, diagnostics, non invasive care or welcoming your baby in the world, our staff keeps delivering services with love and care to our patients.

Saifee Hospital has been continuously acquiring new ways and means and concepts to deliver better healthcare for its patients which is driven by patient safety as its backbone. We have State of the art, cutting edge technology to support patient care.

We conduct some of the very advanced surgical programs HIPEC, PIPEC, renal transplant programs and Cochlear implants and robotic surgeries in varied fields.

Enriching the quality of life is our passion and to provide world class preventive and holistic care to every strata of society in a safe, ethical and affordable manner is our vision.
