

DEDICATED TO PROVIDE HEALTHCARE WITH ALTRUISTIC PROFESSIONALISM

DR. DEEPAK NAMJOSHI & DR. MASUUMA NAMJOSHI

With the motto, “Your Health is Our Concern,” CritiCare Asia Hospital was conceived in the year 1999 by Dr. Deepak Namjoshi. From a 15 bed nursing home to the acquisition of 3 more hospitals in Andheri, Malad and Off BKC the journey has seen several challenges but has been equally rewarding . CritiCare Hospital which is now known as Criticare Asia Hospital has exponentially progressed to become an NABH accredited hospital in India, with a significant number of 700 beds present over four different locations in Mumbai.

DR. DEEPAK NAMJOSHI: Director, Criticare Asia Hospitals

The founders of CritiCare Asia Hospital attribute this massive success and growth to the patients who showed their trust and believed in the services provided by the experts and professionals at these facilities. The founders are also grateful to all the 300+ experienced, specialised and super specialised consultants, and 600+ paramedical and managerial staff who have been passionately working to provide outstanding services to the patients . In a technology driven healthcare services world, CritiCare Asia Hospital is a par excellence Institute that provides preventive, promotive and affordable healthcare to patients from all sections of society, serving as a one-stop solution for all health-related problems since 1999. The Hospital has 8 State of the art Operation theaters 40+ Beds in ICU /ICCU with fully automated pathology and diagnostic department. All the facilities at CritiCare Asia Hospitals are backed by round the clock services of ambulance support, pharmacy, blood bank, vital parameter monitoring system, In emergency ECG, X-ray, 2D echo defibrillator ABG etc..

After introducing the first, Third Generation Advanced Robot with Team Robodocs in Suburban Mumbai at Andheri East last year, CritiCare Asia recently launched Second Advanced Robot to provide Robotic Assisted Total Knee Replacement Surgery at its Malad Hospital with Team RoboCare. This highly advanced technology system utilizes state-of-the-art AI, computer-assisted technologies and robotics to assist surgeons in complex procedures. Its advanced 3D visualization and intuitive control systems offer the best level of precision and control that has not been seen in surgery before. With the help of this innovative technology, surgical procedures will be performed with a new degree of precision and accuracy, enhancing patient outcomes and the healthcare process.

“ Healthcare is a dynamic sector, there are always new challenges that we face, there’s always a necessity to keep evolving ourselves to make sure that we provide the best healthcare to our patients. We make sure that we just don’t treat patients but we treat every patient with care” says Dr.Masuuma Namjoshi. Founder CritiCare Asia Hospital..
