

BHUPENDRA KHANAL THE RESPONSIBLE ENTREPRENEUR

Bhupendra Khanal begs to differ that businesses are all about profits at any cost. He has successfully transcended these self-imposed beliefs to build a successful business that safeguards the health of its customers while staying committed to the upkeep of the environment.

The Khanals, Sneha & Bhupendra, have built their company based on their love for life. The company has two major brands – Dogsee, a line of natural pet products and Himalayan Natives, a line of packaged health food for human consumption sourced from the serene Himalayan region.

Dogsee is currently India's best and most global Pet industry brand selling in over 30 countries, while Himalayan Natives is one of the most prominent health food brands in India in the ecommerce space. That apart, both brands are sold in over 3000 stores globally.

Thanks to Bhupendra Khanal's, Founder & CEO's, expertise in product innovation and business strategy Khanal Foods has gone to become one of the most global Indian food companies

within a short span of 8 years. He is responsible for overseeing the day to day operations of the company while driving it towards the mission of "Making World Healthier for all - Humans and Pets".

Bhupendra hails from Nepal, and came to India on a government scholarship in 2001 to India. He studied B.Tech. (CSE) from NIT Durgapur, and worked in analytics industry before venturing into Entrepreneurship. He has been the co-founder & CEO for companies like Simplify 360 & Marketelligent. He has also co-authored the book "Demystifying Twitter Marketing" and 'Predictive Analytics in Social Media'.

And then the Khanal Foods (KFL) journey started. The company provides products that are untouched by chemicals or preservatives – just as Mother Nature intended. In an industry dominated by chemical-laced rawhide treats, KFL's brand Dogsee gave the pet parents an alternate point of view - that treats can be natural and healthy too!

With Himalayan Natives, the brand brings the Himalayan way of eating i.e. clean and natural food products to the world. With a strong belief that individual well-being compounds up to a strong family and community, the company wants real and nutritious food to be accessible to all humans and pets so that they do not think of making lifestyle changes when told to, but when they want to.

KFL is the youngest and fastest growing profitable FMCG company from India clocking 1.5 bn INR in revenue. Across

both the brands, KFL products are today available in 30+ countries like US, UK, Japan, China, Germany and the likes. The company has 5 facilities totaling over 100 thousand square feet.

The company has created employment opportunities for 400+ people and has helped over 10,000+ farmers from the local Himalayan farming community access significantly improved lives.

KFL is leading the innovation in both pet and human categories. The Dogsee brand that started as a pet treat brand, has now evolved into a healthy pet-care brand with Ayurvedic shampoos, cookies and toys added to the mix. In the near term, the brand is eyeing to disrupt the dog food category by bringing their promise of natural ingredients to the industry. In the medium-term, the brand has plans to expand in other pet categories like cats, fishes, birds etc. Dogsee is the fastest growing and most visible natural pet supplies brand from Asia, and is destined to be a INR 5 Billion brand in the next 5 years. For Himalayan natives, the brand aims to bring the same natural goodness with Ghee, Raw Honey, Himalayan Pink salt and other organic and natural produce. It aims to become a 500 crore brand in next 4 years, selling within India and in the global markets.

Khanal Foods is expanding, with 2 new factories in rural areas of Karnataka in next 18 months.

Bhupendra Khanal is proving that Good Health is good for all stakeholders. We are loving it.
