

DE VILLE PRESTIGE

More slender than ever before, the Third Generation of the De Ville Prestige has been introduced with all the emblematic DNA you'd expect, but with a comprehensive upgrade across the design. This new 41 mm Co-Axial Master Chronometer model in stainless steel is presented on a blue leather strap. The domed PVD sky blue dial features an exclusive 2-in-1 finish, combining a random vertical pattern with radiant sun-brushing, while the display includes a 270° power reserve indicator and a small-seconds subdial.
