

31ST ANNIVERSARY SPECIAL

MISSION 2047: ROAD TO INDIA@100

OPENING ESSAY **66** |

The Amrit Kaal Agenda

India has set an official target of growing its GDP to \$5 trillion by 2024-25, with a real possibility of blooming into a \$26-trillion economy by its hundredth birthday. Here's a road map of how it can power its multi-trillion-dollar dreams

MANUFACTURING **96** |

Making it in India

As manufacturing takes off in the midst of global uncertainty, a large talent pool and digitisation will be the key differentiators for the sector

MARKETS **136** |

Spreading the Equity Cult

The Indian stock market features among the leading ones globally but much needs to be done to improve the country's equity investment culture

BANKING & FINANCE **116** |

Banks and Bytes

In the next 25 years, tech like metaverse, the AA platform, digital currency and UPI will change the face of India's banking industry

ENERGY **152** |

A Shining Example

India has set the world's most ambitious energy transition goal that could reset the rules of engagement for the green energy industry
