Policy 2022, wants to position the state as the largest connected start-up ecosystem by bringing coherence into digital governance, simplifying rules and legislations for technology, and focussing on building the state's hi-tech prowess, digital infrastructure and emerging technology clusters beyond capital Bengaluru across Tier II and III towns.

Under the Karnataka Digital Economy Mission, which aims to foster a Bengaluru-like start-up economy in cities like Mysuru, Mangaluru and Hubli-Dharwad, the state has already registered more

than 400 start-ups and aims to have 800 start-ups by the end of this financial year. Under its new start-up policy, the government plans to create 50 new-age innovation networks in technology institutions outside the Bengaluru Urban district. The government has also announced plans to set up a dedicated start-up park near the Bengaluru international airport.

"Karnataka's vision is to become a champion state for start-ups and foster high growth of 25,000-plus start-ups in the coming years. The state can accelerate its growth to GSDP (gross

state domestic product) of \$500 billion by 2026 and \$1 trillion by 2032, provided it grows at a CAGR of 16.3 per cent. These targets align with India's GDP goals of \$5 trillion by 2026 and \$10 trillion by 2032, meaning the state will become 10 per cent of the national economy," says Narayan.

Then there's Telangana. The state is positioning ecosystem enabler T-Hub as the world's most extensive innovation hub. Boasting of a sprawling 582,000-sq. ft campus across 18 acres, Hyderabad-based T-Hub brings together different stakeholders of the sector to a single
