

A NEW INDIA IN THE MAKING

India is no more just the back office of the world. The country has grown over the years to offer much more and it is still growing, much faster than most other major economies. It aims to increase its value-added exports, and not just raw materials. A vibrant start-up ecosystem and the rising number of millionaires and unicorns suggest that India wants a bigger pie of the global economy in terms of both manufacturing and new-generation services. This is a new India in the making and here's how the numbers look:

By **RAHUL OBEROI** and **PRINCE TYAGI**

Graphics by **RAJ VERMA**

1.63 million
