to build out their whole digital transformation.” To get a bigger chunk of the cloud opportunity, Google is putting in the hard yards with big names in India Inc. The diversified Mahindra Group’s focus areas are customer and employee experience, using data and AI for advanced decision-making, robust cybersecurity, data privacy, and agility. “Cloud technology comes in handy here,” says Mohit

Kapoor, the group’s Executive Vice President & Group Chief Technology Officer. According to Kapoor, factors such as technical and commercial considerations apart from the opportunity to co-develop led to a partnership with Google Cloud. “The decision has enabled us to be agile for our customers, partners and everyone associated with us,” he says.

Then, Google Cloud works with

some large hospital chains in areas such as virtual care services, creation of e-pharmacy platforms, and building remote patient monitoring systems. Bengaluru-headquartered Manipal Hospitals deploys Amwell, a digital care delivery enablement platform that facilitates virtual visits. “The physical hospital is not a necessity now since the access is now significantly larger. Google brings in the technological capabilities that hospitals do not have,” says Dilip Jose, MD & CEO of Manipal Hospitals. Google’s solutions on the Indian language front have helped—today, a patient can listen to a medical expert in around 10 Indian languages.

The need to make products simple can never be exaggerated. Roma Datta Chobey, Senior Director-Digital First Businesses at Google India, points to Performance Max, a solution that uses AI to help advertisers manage their entire Google Ads inventory from a single campaign. “You can now drive profitable growth and reach high-value customers across channels like Search and YouTube to reach customers you may not have considered before with help from our AI,” says Chobey.

Google’s understanding of what works for the evolving consumer is a lot sharper, too. “Digital plays a central role in the consumer journey. Every consumer interacts with at least one digital touchpoint before making a purchase and it may be the most important one. In this multi-channel, multi-touch journey, consumers leave behind a wealth of data, which marketers analyse to build strategies,” says Prasad Shejale, Founder & CEO of LS Digital, a digital transformation group. Citing the example of a life insurance firm where 60-65 per cent of sales attributed to traditional channels actually had at least one digital touchpoint, he says “Brands need to incorporate
