The past eight months have been absolute mayhem for crypto investors globally.

They lost over \$2 trillion in the bloodbath.

The US Fed rate hike, geopolitical uncertainties and the Celsius and Terra

Luna liquidity crises have dampened investor sentiment. Market

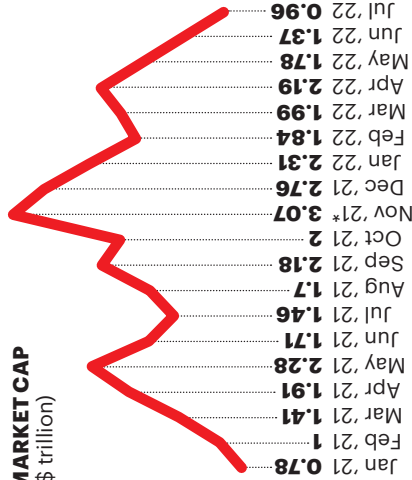

observers expect cryptos to bounce back in the fourth quarter, while some are still sceptical

BLOODBATH

The total market value of cryptocurrencies crashed nearly 70 per cent since November 2021

MARKET CAP

(\$ trillion)

*Nov. 9, when m-cap hit an all-time high

INDIA MIRRORS GLOBAL CRYPTO CRASH

Investor sentiment took a further hit in India, with the application of 1% TDS on crypto from July 1, 2022

70%

Dip in trade volumes on Giotus crypto platform, one of India's leading crypto exchanges, since the introduction of TDS

83%

of traders attribute the drop in trading frequency to the recent tax mandate, as per a WazirX-Zebpay survey

27%

of the respondents sold over 50 per cent of their portfolio before April 1, according to the survey
