

Dr. Raajiv Singhal

Founding Member, Managing Director & Group CEO, Marengo Asia Healthcare

HOW YOU HAVE STARTED AND HOW DO YOU SEE THE ROAD AHEAD?

Marengo Asia was established in the year 2020 with a vision of 'Patient First'. The entire vision of the platform is to set up a Pan India 5000 bed network over a period of time. Currently, we are equipped with three hospitals, Marengo QRG Hospital, Faridabad, Marengo CIMS Hospital, Ahmedabad and K K Patel Hospital, Bhuj with 1300 beds, 450+ doctors and 3500 employees. We hope, by this year-end or end of this financial year, we should have around 2000 – 2500 beds. We are looking at right assets where there is an opportunity to scale, build quality and ensure they are a part of our concept of clinical corridor. Today, Marengo Asia Healthcare is the fastest growing operating platform and I look forward to taking the challenges in my stride to contribute significantly to the changing face of healthcare in India by creating an equitable ecosystem where every human being receives quality healthcare.

THE UNIQUE CHARACTERISTICS

Our **vision** at Marengo Asia Healthcare is 'Patient First' where all decisions taken in the medical space are aimed at patient's benefits. We go beyond 3A's of Awareness, Accessibility and Affordability in healthcare, to incorporate the fourth 'A' in our philosophy, which is Accountability, to our patients, to the society we live in, to our employees and to our other stakeholders and to all the people who are associated with our ecosystem.

Patient over profit, care over commerce is our motto. Every decision taken for a patient is a litmus test whether the same decision can be taken for one's family. This defines the scale we measure our service deliveries to our patients to establish trust and transparency.

Centers of Excellence in certain specialties at Marengo Asia hospitals reduce expenses for patients

Our vision at Marengo Asia Healthcare is 'Patient First' where all decisions taken in the medical space are aimed purely at patient's interests.

significantly by making a quantum of therapy accessible and affordable at their doorstep.

Clinical Corridors in healthcare ecosystem bring talent from one hospital to another Marengo Asia hospital to optimize the best in healthcare services and we continue to strengthen the concept of clinical corridor.

Our Foundation continues its work in focusing on creating awareness on early detection and appropriate treatment in cancers in men and women and congenital heart diseases in children.

We have undertaken tasks in aligning ourselves with UN sustainable Development Goals and have pledged

planting 50,000 trees in the locations of Marengo Asia hospitals.

OPPORTUNITIES AND CHALLENGES FACED

Opportunities have expanded and amplified with more and more foreign investments looking to invest in healthcare. Super specialists in healthcare, clinical excellence and affordability in quality healthcare are rendering India as a preferred destination for medical tourism globally.

Digitisation has transformed healthcare in an unprecedented manner presenting unexpected opportunities for expansion and penetration into pockets to enhance affordability of quality healthcare to more and more masses with enhanced patient experience.

Manpower remains a challenge in India where the ratio of nurses to patients is a gap which continues to remain. Attrition in healthcare in the support manpower is a challenge healthcare is still trying to overcome to shift focus to enhancing patient experience and quality.

TURNING POINT

My tenure in the Armed Forces as a Surgeon treating soldiers with bullet injuries, grenade and mine blasts in the difficult terrains of the Siachin and North-East jungles were challenges and turning points in my life. But when an injured soldier was brought in on a stretcher at the hospital and after treatment he walked out the door on his feet, the feeling was very humbling of saving another life!

THE LEADERSHIP QUOTIENT.

My leadership quotient rest on the three C's - **Competency in leveraging clinical excellence to clinical corridors where quality healthcare is accessible to all, Character in unconditional accountability to patients and Capability in changing the face of healthcare.**
