

Mr. Rajan Verma

Director and Business Head, MDD Medical

The humanitarian and economic dislocations resulting from the pandemic have affected companies in India and the world

HOW MDD MEDICAL WAS STARTED ?

MDD Medical founded by Shri Subhash Chander Verma (Founder Chairman) in the memory of his Late mother Mata Dropati Devi. It started its operations in 2003 and in the short span of few years MDD has achieved a lead position and executed, commissioned more than 1000 Hospitals projects of different magnitude which includes cancer institutes, IVF set up, trauma centre, institute of cardiology, Neuro & Ortho Centres in India, South Asia and Africa on turnkey basis in last 18 years. MDD is specialized in Medical Infrastructure and Architectural Solutions. They supply and install most modern and contemporary system with state-of-the-art technology, equipments with complete warranty, operation and planned preventive maintenance as cost effective, economical and ergonomic solutions to suit the client's requirements. MDD is categorized as a Medium Enterprise registered under MSMED act 2006 vide Udyam Registration No. UDYAM-HR-05-0007946 & SMERA Rating SME 3.

MDD have successfully completed

- 500 hospital projects in India
- 15 AIIMS Hospital projects
- 100 Medical College and Hospitals
- 30 PMSSY Super Speciality Hospitals
- 20000 covid hospital beds

THE UNIQUE CHARACTERISTICS

MDD works on six basic principles for

Critical Care Medical infrastructure & Architectural Solution- Identity of supply, Quantity of supply, Continuity of supply, Quality of supply. Safety of Supply & Timely completion of Supply. They have expertise in designing, flow rate calculations, bed space management which are the game changer & key factor of making better infrastructure in covid situation.

CHALLENGES AND OPPORTUNITY FACED

- EPC in Health Care : Lifesaving operation theatres, intensive care units, central sterile infection control system and medical gas delivery system are merged with civil construction works which is Risk to Human Life and Patient Care.
- The basis of selection of medical associate sub-contractor is only on the basis "The Factor Price" which ends up in getting low quality substandard products for operation theatres, intensive care units, and medical gas delivery system and making weaker Indian healthcare.
- Lack of Knowledge and lack of experience by Architectural & Healthcare consultancy firms which is making healthcare system noncompliance.
- Delay and non-payment by Government department and its PSU which is making medical companies week.
- Technical expertise evaluation of medical companies is not in placed.

TURNING POINT

The humanitarian and economic dislocations resulting from the pandemic have affected companies

in India and the world. Healthcare has become one of India's largest sectors, both in terms of revenue and employment. Healthcare comprises hospitals, medical infra and architectural services, medical devices, telemedicine, medical tourism, and medical equipment. The government, i.e. public healthcare system, comprises limited secondary and tertiary care institutions in key cities and focuses on providing basic healthcare facilities in the form of primary healthcare centres (PHCs) in rural areas. The private sector provides majority of secondary, tertiary, and quaternary care institutions with major concentration in metros and tier-I and tier-II cities.

1. Registration of Medical Devices in India "CDSCO Registration"
2. Government of India providing special budgets for improving Indian Healthcare infrastructure.
3. Medical Devices Parks are coming for boosting Make in India Medical devices.
4. Organization Like GMAAF, NABH, Healthcare Sector Skill Council is making contribution for shaping Indian Healthcare "Mission 2030"

THE LEADERSHIP QUOTIENT

At MDD, we combine innovative joining technologies like self-pierce riveting, adhesive dispensing and flow drill fastening. Regardless of the individual technology – we know how to join.. We offer a comprehensive innovation partnership and accompany their clients in every step of the development process. They manufacture, design, supply and install operation theatres, intensive care units and medical gas delivery supply system with a cutting-edge, innovative, high-grade sterile operation theatre system, promising superior quality anti-bacterial performance.

At MDD Medical, they consider minute details and needs before supplying and installing the advanced operation theatre, intensive care units and medical gas delivery system. MDD operation theatre, intensive care units and medical gas delivery system are modular and tailor-made system which can be upgraded in future as per hospital requirements.

We MDD are experts in our customers' processes. We ensure to our customers that MDD Technological solutions are developed and tested in real life conditions and processes.
