NO ROOM TO MANOEUVRE

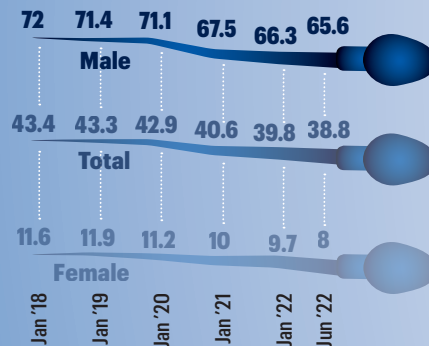

India's population will be twice that of China by 2100, according to the UN's median projection[#]

(Figures in million)

LABOUR PAINS

With the population rising, any further drop in labour force participation rate may impact India's GDP growth

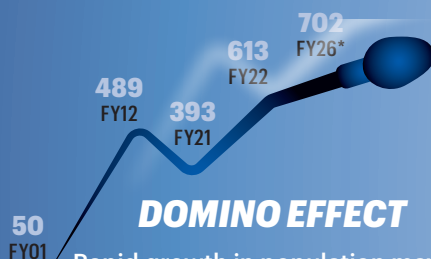

(All-India labour force participation rate as a percentage of the working-age population)

DOMINO EFFECT

Rapid growth in population may lead to a further rise in total imports, which has already jumped 12 times since FY01

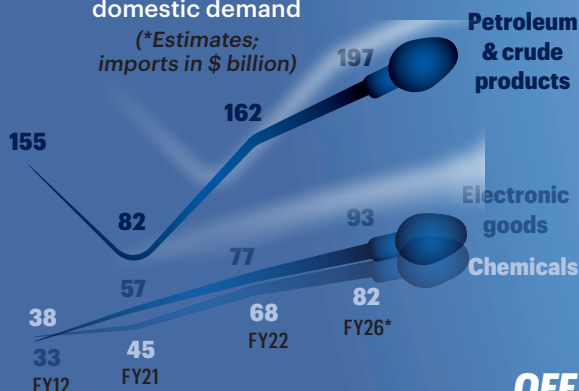

(Total imports in \$ billion; *Estimates)

IMPORT BURDEN

Imports of select commodities will increase further to meet domestic demand

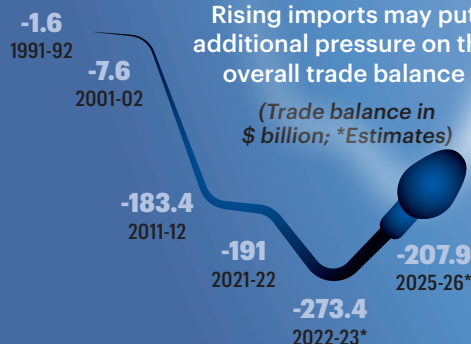

(*Estimates; imports in \$ billion)

OFF BALANCE

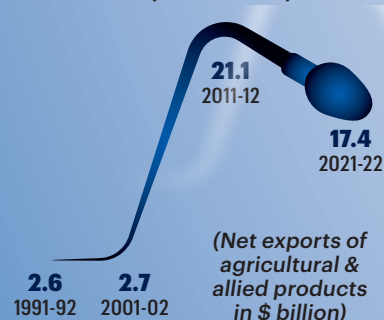

Rising imports may put additional pressure on the overall trade balance

(Trade balance in \$ billion; *Estimates)

RISKS AHEAD

With the population rising, it will be a challenge for India to remain a net food surplus country

(Net exports of agricultural & allied products in \$ billion)
