help both the developing and developed countries.

Kamath of NaBFID feels India Stack can become a model for the world. "UPI is a global settlement system and is much more modern and nimbler [than its peers]," he says about the digital payments system that is finding takers in Singapore, the UAE and France.

"A major impact of India's G20 presidency is the recognition that digital public infrastructure is an inclusive and efficient way to provide public service delivery. And India has demonstrated that using DPIs, countries can provide world class services at a fraction of the existing costs. There are many developing countries, especially in sub-Saharan Africa, that can tremendously benefit by customising DPIs to their

domestic context," says Deepak Mishra, Director and Chief Executive of the Indian Council for Research on International Economic Relations (Icrier), a think tank.

As per the road map of the Digital Public Goods Alliance—a multi-stakeholder UN-endorsed initiative that facilitates the discovery and deployment of open-source technologies—India is a world leader in developing and deploying digital public goods (DPG), with as many as 42 developed and 49 deployed DPGs. While India leads the list of G20 nations using DPGs, it is followed by the US, per Icrier.

At the Global DPI Summit, held in Pune this June, India signed MoUs with four countries—Armenia, Sierra Leone, Suriname, and Antigua and Barbuda—on shar-
