movement, today's mass movements will power the next wave of growth.

This will happen through the mantras of Vocal for Local, Aatmanirbhar Bharat, Zero Defect & Zero Effect in manufacturing, Zero Import, Maximum Export in Agriculture, and Self-Sufficiency in energy needs.

As our citizens are putting these principles into action, we are also moving closer to our goals. Global manufacturers are coming to India and an era of unprecedented job creation is unfolding. And when I say Vocal for Local, for me, anything which is made in India with the sweat and toil of Indians is local.

Around 10 years back, India was being counted among the Fragile 5 countries. India was seen as a country which was not living up to its full potential.

In 10 years, India has moved from the 10th largest economy of the world to 5th largest economy of the

“The poor and the planet, both need to be helped. India is moving ahead on this with not only a positive attitude but also a mindset of driving solutions”

world. In 10 years, India is now seen as a country with immense potential which is backed by impressive performance.

The government's infrastructure push in the recent years is also helping crowd in private capex. Gross
