

3. YOUTHFUL DEMOGRAPHIC

ADVANTAGE: The summit will explore strategies for holistic skill development, education reform, and job creation, going beyond the demographic advantage to harnessing the potential of the youth. It will delve into the po-

tential of emerging sectors such as renewable energy, artificial intelligence, and advanced manufacturing to absorb and empower the country's youthful workforce. The discussions will emphasize the role of vocational training, apprenticeships, and mentorship programs in ensuring a seamless transition from education to employment.

4. THRIVING SERVICES SEC-

TOR: The summit will take a comprehensive look at not just the IT and IT-enabled services, but also at other areas such as health-care, tourism, and entertainment. Special emphasis will be placed on cross-border collaborations, international partnerships, and strategies for enhancing India's role as a global services hub. In addition, discussions will revolve around enhancing service quality, leveraging data analytics in service industries, and crafting unique value propositions to attract global clients.

5. GLOBAL COMPETITIVE-

NESS: The summit's discussions on global competitiveness will extend to examining India's role in global value chains, focusing

on building a robust manufacturing sector and reducing dependency on imports. This will involve exploring how India can diversify its exports, enhance manufacturing capabilities, and promote innovation-driven entrepreneurship. The summit will feature insights from global business leaders and experts on fostering a conducive business environment, navigating international trade dynamics, and capitalizing on India's geopolitical standing.

6. SUSTAINABILITY

COMMITMENT: The summit will explore India's commitment to sustainable development, not only in terms of environmental conservation but also in terms of inclusive economic growth. It will delve into the integration of sustainable practices across sectors, including renewable energy adoption, circular economy initiatives, and environmentally responsible urban planning. The summit will provide a platform to discuss how economic growth and sustainability can be mutually reinforcing, setting an example for the world and establishing India as a beacon of responsible development.
