Is there any interest from the Global South or developing countries in India's digital stack?

India's collaboration with numerous countries for UPI highlights the potential for the G20 to provide a boost to such partnerships. As a normative body, the G20 plays a pivotal role in suggesting policies, frameworks and principles. Our focus is on determining the principles that can govern the use of DPIs, and creating a framework that fosters co-operation among nations. The G20's role extends to supporting countries in this attempt, setting a template for enhanced co-operation, and assistance to developing nations in establishing DPIs.

a robust ecosystem, including enhanced connectivity, roads and infrastructure through initiatives like 'Gati Shakti'. The rapid development of infrastructure is driving the creation of a strong manufacturing industry. This has led to successful collaborations with global companies like Apple, First Solar, Foxconn and Micron. As we progress, we anticipate significant developments in this domain.

What are the kind of discussions happening in the start-up space?

India played a pioneering role in bringing the start-up sector to the G20 and introduced the Startup20 initiative, which has been immensely successful. Its accomplishments are evident in the Startup20 Communiqué that has provided comprehensive recommendations

Our expertise in DPI presents an opportunity to assist many other countries seeking to empower their people through best practices

Is there a need for financial support for climate change, considering that countries in the Global South lack institutions that can give such support?

The emphasis on climate actions or advancing timelines for achieving net-zero is unlikely to yield the desired results without the mobilisation of adequate resources. The G20 has played a crucial role by reaffirming the pledge of developed nations to raise \$100 billion in climate finance each year from 2020 to 2025. This funding is aimed at addressing the needs of developing countries in conjunction with meaningful mitigation efforts and transparent implementation. But more needs to be done to make adequate and appropriate financing available to developing countries in their green transition process.

How is India approaching the trade aspect?

To attract foreign investments and become a manufacturing hub, the government is working on creating

like the focus on nurturing entrepreneurs dedicated to the SDGs across all G20 nations. We have also initiated the Disaster Risk Reduction Working Group.

►►►

How is the G20 addressing critical technology-related issues especially around AI, big tech, digital currencies and cryptocurrencies?

We are working on providing a platform where the world can come together to discuss various important aspects, including macroeconomic and financial issues and their implications, and agree on an appropriate framework under which countries can work on matters related to cryptocurrencies. Given that it is a relatively new technology, it becomes crucial to address the risk aspect. We are also committed to combating corruption and countering terrorism, both of which are integral components of our objectives and are supported by fellow member nations. **BT**
