

CLASSIC MEETS MODERN

Representative of a blend of purity and refinement, the first interpretation of the Breguet Classique 7337 wristwatch was introduced in 2009. The 2022 Breguet Classique 7337 Calendar version is a contemporary and elegant incarnation of the original timepiece, that remains wonderfully faithful to the powerful signatures of the Classique line.

Robust design codes, timeless aesthetics, signature features: the Breguet Classique Collection has been traditionally associated with all three of these. The newly-launched Breguet Classique 7337 Calendar is no different, oozing elegance and sophistication, while designed to look more modern.

Delight is in the detail

Keeping in mind the elegant, subtle, and pure designs the Classique collection is known for, the new Classique 7337 Calendar features a modern style while retaining the strong codes that have forged the brand's history.

From the off-centered dial decorated with an excellent, hand-engraved Clous de Paris hobnail guilloché pattern to the circular barleycorn motif on the outer dial, each watch features the brand's signature decorative elements. The white dial is also home to a gold moon-phase display at 12 o'clock, which is hand-hammered.

The hours, minutes and seconds are indicated by the traditional blue steel open-tipped Breguet hands. The date and day are respectively placed at 2 and 10 o'clock. The windows feature a broad aperture for enhanced readability.

Mapping the movement

At the heart of its 39 mm white or rose case is Calibre 502, which is one of Breguet's thinnest movements at just 2.4 mm thick, and yet wonderfully efficient. This rhodium-plated self-winding movement consists of 236 components, and comes equipped with a silicon balance-spring as well as an escapement featuring an inverted straight-line pallet-lever with silicone horns, making the timepiece corrosion-proof and resistant to magnetic forces.

Finally, the balance of the new Classique Calendar 7337 oscillates at a frequency of 3 Hz and has a 45-hour power reserve.

Case: 18K white gold or rose gold

Diameter: 39 mm

Thickness: 9.95 mm

Dial: in gold, hand-engraved on a rose engine

Movement: Self-winding

Functions: Moon phase, day, date, off-centred chapter ring, small seconds

Balance-spring: flat, in silicon

Escapement: inverted straight-line lever

Water resistance: 3 bar (30 m)

Calibre: 502.3 QSE1

Frequency: 3 Hz

Power reserve: 45 hours

Components: 236

That this movement is wonderfully visible through the sapphire case back beautifully highlights Breguet's décor prowess.

Available in 18K white or rose gold, this new timepiece is fitted with a strap in midnight blue for the white gold model and a mysterious brown for the rose gold version.
