

WHERE MINIMAL IS MAJESTIC & LEED TO SUSTAINABILITY

The real estate conglomerate, DLF Ltd symbolises the power of a dream, aspiration and passion for creating spaces that enhance good living & wellness. The real estate developer has pioneered several commercial and residential projects leveraged by the advantage of experience, resources and the vision to think ahead of its times. Today brand DLF is leading the industry with matchless quality, innovation & governance and which has led to sustained growth and customer satisfaction for over 75 years.

In the last two decades, Gurugram has witnessed unprecedented real estate activity transforming the once sleepy semi-rural town into one of India's largest IT/ITES outsourcing hubs. Almost all the major IT companies have leased offices in Gurugram where people from different regions and cultures of India and different nationalities from across the world, converge to achieve their professional aspirations. It is a matter of pride that the legacy of DLF commercial offices is prominently visible across the skyline of the city and spans more than 125 acres and is home to several Fortune 500 and leading Indian and global companies.

DLF Cybercity, Gurugram has one of the most advanced and modern infrastructure facilities that conserve energy and water and has an efficient waste management system. The entire Cybercity operates on an integrated model of sustainability, incorporating numerous green initiatives such as zero water discharge, rainwater harvesting, e-waste segregation, gas-based electricity, EV charging stations, and solar energy. In addition, it has excellent last-mile connectivity with Rapid Metro linking all the offices within Cybercity. All buildings in DLF Cybercity are equipped with MERV-14 air filters,

which have significantly improved the indoor air quality, resulting in a better quality of life and workplace wellness. The industry leading best practices of DLF has grabbed unstinted attention and appreciation besides getting them top honours and awards.

Recently, the global spotlight was on DLF Cybercity, Gurugram, for being awarded the World's first LEED Platinum City and Community Certification from US Green Building Council. This prestigious US Green Building Council's certification of "LEED Platinum for Cities & Communities" is verified by Green Business Certification Inc. (GBCI). With this award, DLF Cybercity has become the first Developer owned community in the world to have received this certification under LEED Cities and Communities Rating System. LEED is an international symbol of sustainability excellence and green building leadership that signifies reducing carbon emissions, conserving resources, reducing operating costs, prioritizing sustainable practices, and creating a healthier environment.

Managing Director of the DLF Rental Business, Mr. Sriram Khattar, mentioned, "The LEED Platinum for Cities and Commu-

nities certification is a recognition of our initiatives and endeavours on a global platform. It also validates DLF's ability to build world-class sustainable assets, vibrant communities, and a healthy business ecosystem. It is a proud moment for India, Haryana, and Gurugram and all of us at DLF."

On the tough road to achieve this industry benchmark, **Mr. Gautam Dey, Executive Director, Operations, DLF** said, "Every building in DLF Cybercity is LEED Platinum certified but we didn't stop there. We made sincere efforts and aggressively pitched for this rarest of the rare Green Certification from USGBC for our entire Cybercity, Gurugram as a City / Community. It was a long drawn and tough process with a series of evaluations and audits by the USGBC team from US & Indian auditors for the last one year and the final moment of receiving this honour is truly gratifying."

Taking the DLF Legacy Forward

The largest portfolio-holder in terms of premier properties, the ISO certified DLF has an edge over its competitors for having in-house expertise that covers the entire gamut from identification and acquisition
