

supplies water to the Thane municipal area and other nearby areas in the Mumbai Metropolitan Region (MMR). Furthermore, the corporation also helps the industries get power supply and facilitates other regulatory permissions required for seamless establishment and production.

The Maharashtra government accorded the Special Planning Authority status to MIDC, which provides the Corporation autonomy in industrial area development and also helps it in extending these benefits to the industries. In its 60th year, Maharashtra today is also the nodal agency and the go-to corporation of Maharashtra government for special projects and projects of national importance.

In addition to the planned sector-specific parks such as the Electronic Manufacturing Cluster, Mega Food Park, Mega Textile Park, Bulk Drug Park etc., MIDC has developed India's first greenfield smart city, AURIC (Aurangabad Industrial City) in collaboration with NICDC (National Industrial Development Corporation). MIDC, along with NICDC, will also be developing the Dighi-Mangan Industrial Area, near the Dighi port, as the second node of DMIC (Delhi Mumbai Industrial Corridor) in Maharashtra.

The Corporation is also the nodal agency for the PM Gatishakti co-ordination for the state of Maharashtra. PM Gatishakti is aimed at strengthening connectivity, reducing compliance turnaround and enhancing industrial activity in India. The MIDC is also developing five Multi-Modal Logistics Parks (MMLPs) across the state, in coordination with NHAI, to boost the supply chain and reduce the cost of logistics. Additionally, MIDC will also be developing industrial nodes along the Samruddhi Mahamarg, 700 km-long, 8-lane expressway connecting Mumbai to Nagpur.

Additionally, the Corporation is also the nodal Investment Promotion Agency (IPA) for the state of Maharashtra. As the nodal IPA, it has been facilitating and handholding investments and is also responsible in establishing the credibility of Maharashtra's investment attractiveness, domestically and internationally. As the nodal IPA, it helped the state organise the marquee Make in India event in 2016, and the Magnetic Maharashtra summit in 2018, garnering an investment of Rs 9.11 lakh crore. Evenduring the global slowdown due to the pandemic, it has managed to attract a tremendous Rs 2.7 lakh crore investment intentions over the last two years. Furthermore, MIDC has helped ground more than 80 percent of the investment MoUs.

The pursuit of economic and infrastructure development, today, is being undertaken in a sustainable manner. Along with building key facilities such as CETP (Common Effluent Treatment Plant), Common boilers and STPs (Sewage Treatment Plant), MIDC is undertaking steps to be carbon neutral and comply with global ESG standards. During the pandemic, along with the relief work, the Corporation also held stakeholder consultations to understand concerns of the industry and resolved them. Additionally, it helped mobilise initiatives under the Magnetic Maharashtra program, such as the Mahajobs, Maha-Parwana, Plug and Play infrastructure - Investor First Program and Country Desks to continue the momentum of investments in the state.

Indo Rama Synthetics India Ltd., Butibori, Nagpur

The global competition in investment attraction and facilitation has been increasing and it has become imperative to provide seamless facilitation and world-class infrastructure to the industry. The MIDC, today, is building industrial infrastructure for the future and is focusing on key sectors such as semiconductors, data centres and EV (Electrical Vehicles), while simultaneously strengthening traditional sectors such as Textiles, Auto, Pharma, IT etc. by creating specific parks for an integrated value chain ecosystem development.

The Corporation, from an industrial area development authority, in 60 years, has transformed into an end-to-end facilitator for industrial development in Maharashtra and has contributed tremendously in making Maharashtra the largest state economy in India. No wonder that MIDC is spearheading Maharashtra's journey to be the first trillion-dollar economy in India and realising its motto - 'Prosperity to all through Industrialisation
