

OMEGA SPEEDMASTER '57 CALIBRE 9906

WHERE TO BUY OMEGA SHOWROOMS
PRICE ON REQUEST

► **As the name suggests**, the Speedmaster '57 is emblematic of the original Speedmaster design, which was released in 1957 for racing car drivers. It also became the first watch to be worn on the moon. The Speedmaster '57, first introduced in 2013, returns in 2022 with a master chronometer upgrade and a slimmer profile. The new collection consists of eight new stainless steel models, all powered by OMEGA's co-axial Master Chronometer Calibre 9906. At just 12.99 mm, the new '57 is considerably slimmer than the Speedmaster Moonwatch 3861 at 13.58 mm. And, there is always a nod to the Speedmaster's space legacy—the bracelet on the steel version is inspired by the Apollo 11 tribute launched in 2019.

CHOPARD HAPPY SPORT MÉTIERS D'ART

WHERE TO ENQUIRE www.chopard.com
PRICE ON REQUEST

► **Chopard's Happy Sport Métiers d'art** line includes three exquisite watches that pay tribute to the polar bear, the hummingbird, and the sea turtle. The intricately handcrafted watches are made of gold and feature mother-of-pearl marquetry with precious- and semi-precious stones that create exquisite, tiny ecosystems in their dials. Limited to only eight pieces each, these timepieces are equipped with the Chopard Calibre 96.23-L mechanism, with a 65-hour power reserve. The collection is a testament to the love for nature of Chopard's Artistic Director and Co-president, Caroline Scheufele, and to the company's dedication to sustainable growth.
