near-term growth drivers or what it calls its "Horizon 1" of growth. It has a plan for long-term growth (Horizon 2) as well. "As the pharmaceutical landscape evolves, we see intense competition in traditional generics, disruption brought on by new players and new business models, and demand for holistic healthcare solutions," says a company spokesperson, adding that Dr. Reddy's plans to deepen its presence in nutraceuticals, discovery and development of immuno-oncology NCEs (new chemical entities or new molecules) at subsidiary Aurigene Discovery Technologies, and strengthen its contract development and manufacturing company (CDMO) services. Dr. Reddy's is also exploring new spaces such

as digital healthcare services, clinically differentiated assets, biologics and cell and gene therapy, and disease management.

Pharma major Cipla indicates a focus towards wellness and lung specialty businesses. "Today, we are witnessing a massive transition towards wellness and we aim to build a wellness-oriented business. We are also continuing our quest of attaining global lung leadership," says Umang Vohra, MD and Global CEO of Cipla. "On innovation, we are actively working on newer constructs like mRNA, stem cells and biosimilars."

Sun Pharmaceuticals, India's largest pharma company, has also defined some growth drivers for itself.
