THE 10-POINT AGENDA

Battle-scarred due to the uncertainty and volatility of the past few years, Indian banks are now on firm ground. But they need to keep innovating to maintain the momentum

86 |

BANKS IN INDIA have taken great strides in improving their reach and performance in the past few years. As a result, not only has the sector emerged from the overhang on non-performing assets and the shadow of Covid-19, but it is also well-placed to scale at a rapid pace today.

A robust banking sector is critical for the sustained economic growth of the country. This column captures the 10 major trends that may shape the banking sector in the year/s ahead and the impact they would create.

1. Scale Matters Scale and reach matter in banking. Consolidation of the public sector banks and the recently announced merger of HDFC Bank and HDFC Ltd has created banks with large economies of scale. This is likely to exert pressure on the other
