25	HCL Technologies	54.37	7.57	7.66	7.56	7.49

How We Did It

► **LIKE IN THE PREVIOUS YEAR**, *Business Today* and Taggd reached out to salaried employees of companies in India, across sectors, to participate in an open online survey. There were more than 35,000 respondents to the survey this year, compared to 32,000-plus last year. A certain proportion of respondents were randomly called back to cross-check their credentials and to ensure that the quality of responses were of acceptable standards.

We asked the respondents to select and rank three companies that in their opinion are the best companies to work for in India. Rank 1 has higher weight as compared to rank 2. Also, the gap between rank 1 and rank 2 is considered to be more significant than the gap between rank 2 and rank 3. This difference will be implemented by using

the 90 per cent rule, wherein rank 2 gets 90 per cent of the weight as rank 1, and rank 3 gets 90 per cent of the weight given to rank 2, and so on.

Once they picked these firms, we asked the respondents to rate them on each of four factors—people growth initiatives; people well-being; engagement and connect; and thinking beyond business—on a scale of 1-10 (1 being low importance, 10 being high importance). Once rank scores were computed, the top ranked company was given an index score of 100 and the scores of the other companies were indexed to the top company's score.

The process resulted in identifying the Top 25 Best Companies to Work For in India, and the Top 4 companies across 12 sectors. **BT**
