

# MAHINDRA ACCELO: RISING WITH DECARBONIZATION

Climate change is one of the biggest challenges the world is facing today, impacting the natural, economic and social systems we depend on. All industries and communities, directly or indirectly, are threatened by the effects of climate change. Mahindra Group with presence in 100+ countries, understands the importance to combat the challenges presented by climate change for the planet's sustainability and business profitability.

**M**ahindra Accelo is part of \$30 bn Mahindra Group. Mahindra Group was formed in 1945 and its 1st business was steel trading and Mahindra Accelo has carried forward that legacy and today has transformed into a leading Mobility & Energy Component Company. Mahindra Accelo's leads the decarbonization revolution by offering sustainable products and recycling vehicles to create resilient & sustainable world. Mahindra Accelo caters to Mobility & Energy segment. Mahindra Accelo as part of Mahindra Group has set an ambitious target to be carbon neutral by 2040 and is taking substantial strides towards achieving the same through product innovation & enhanced focus on developing sustainable products.

**Mobility segment** – Accelo supplies high end and sustainable components to Electric Vehicles and automotive segment. Us-

ing advanced high strength steel, Accelo makes critical components that make today's vehicles lightweight, safer and more fuel efficient.

With state-of-the-art facilities, Accelo manufactures BiW components such as Skin Panels, Class A Components, Class B, progressive stampings etc. By investing in high end technology, Accelo is developing capabilities to manufacture motors, battery casings, motor cores for Electric Vehicle industry.

**Energy Segment** – Mahindra Accelo is one of India's leading component suppliers for Power, Electrical stampings & purlins industry. Our high grade components for transformer industry ensures low generation & transmission losses. Further we are supplying components for Renewable energy industry thereby helping in adoption clean & green energy.

## Mobility

Mahindra Accelo is a leading player in the space of

- (i) Automotive component
- (ii) EV component and
- (iii) Automotive recycling

## Energy

Mahindra Accelo is one of the leading suppliers for

- (i) Power
- (ii) Electrical stamping
- (iii) Purlins
