Introduction: In today's rapidly changing world, integrating Environmental, Social, and Governance (ESG) principles has become essential for creating resilient real estate assets that deliver long-term value to stakeholders. Nucleus Office Parks (NOP) is a fully-owned Blackstone portfolio company managing an industry-leading portfolio of over 20 million square feet of Grade A commercial assets spread across key markets. They are leading the way in sustainability through their unwavering commitment to ESG. With a strong focus on energy efficiency, renewable energy, waste management, and CO2 reduction, NOP is setting new benchmarks in sustainable building designs and operations.

In recent years, sustainability has emerged as a powerful and influential trend in office spaces. With growing awareness of environmental concerns and a collective desire to combat climate change, businesses and organizations are increasingly prioritizing sustainability in their operations.

This shift represents a significant departure from the traditional notion of office spaces solely as functional areas for work into dynamic ecosystems that integrate environmental responsibility, energy efficiency, and employee wellness.

Nucleus Office Parks (NOP) stands as a shining beacon of sustainable operation and creating value for its stakeholders.

NOP's proactive asset management concept is to produce 'buildings of choice'.

As part of their efforts, NOP has achieved various accolades, including the largest WELL at scale enterprise account, the first developer-owned project to achieve a LEED Zero certification for its asset in Bengaluru, and the largest LEED v4.1 O+M private portfolio in India.

The Shine on Sustainability

Recognizing the evolving business paradigm, NOP has embraced the belief that businesses have a more profound commitment to society than merely creating wealth for investors. This perspective has led them to align with (ESG) principles.

Crowning Glory: The GRESB Recognition

In 2022, NOP achieved a prestigious 5-star rating from GRESB (Global Real Estate Sustainability Benchmark), signifying its outstanding performance and effective implementation of its ESG framework. This accomplishment is a testament to NOP's commitment to sustainability and ongoing efforts to enhance its sustainable practices. GRESB further highlighted NOP's efforts by publishing a comprehensive case study highlighting the best practices NOP implemented within a short duration.
