POWERING CHANGE

Nandan Nilekani, Co-founder & Chairman, Infosys

» Nilekani said that India has an approach where the country knows how to balance regulation and innovation, and the same thing will have to be done for AI because the user base of AI in India is going to be huge

» Describing the potential impact of AI as both “scary” and “exciting”, Nilekani said that AI will have a significant impact on almost every business, forcing companies to become “AI first” in their approach

» Addressing the concerns of job displacements, Nilekani said the implementation of AI will increase output, which will, in turn, drive the demand for a larger workforce to meet the increased output

A GLOBAL AVIATION HUB

Rahul Kanwal (left), News Director, India Today and Aaj Tak, and Executive Director, Business Today

Jyotiraditya Scindia, Union Minister of Civil Aviation and Steel, Government of India

» Minister Scindia said that the government is working to develop Delhi into a passenger throughput terminal with the capacity of handling 109 million travellers per year, with plans to eventually develop multiple such hubs

» He admitted that the legacy of giving away multiple routings had led to hubs being created in the vicinity of India's borders. Hence, the country should reclaim the traffic going to overseas hubs

» He also said that the government is working to see how the volatility curve in terms of landing and departure timings between domestic and international flights could be flattened
