

1 Indian airlines have ordered 1,115 planes; they'll arrive over the next decade. Air India: 470 wide- and narrow-body aircraft, IndiGo: 500, Akasa Air: 72 Boeing narrow-body aircraft, of which 16 have been delivered, Go First: 72, Vistara: 17

2 Some 150-175 aircraft will arrive in 2024 and require an additional 1,800-2,000 pilots to fly them, per CAPA estimates. One commercial aircraft requires at least 14-16 pilots (7-8 pilots and co-pilots each) for smooth rostering

3 Only an average of 600-700 trainee pilots have been earning their Commercial Pilot Licences through DGCA every year, over the past few years

4 That works out to a more than 100 per cent shortage of commercial pilots, say experts. And as pilot training takes a good two years, the shortage is a looming crisis, they add
