

RIDE IT RIGHT

Carrying along a heavy suitcase is tiring. But what if your suitcase could carry you around? This nifty carry-on baggage supports passengers up to 117 kg. With a throttle, brakes, and easy to use telescopic handlebar to steer the suitcase, navigate the airport with ease. With a top speed of 12.8 km/hr, the lithium batteries have a range of 9.6 km when carrying an 80-kg rider. While it charges to 80 per cent in just 15 minutes, it takes two hours for a full charge. Do remember though that you'll have to pay for excess baggage as this cabin luggage weighs 9 kg when empty. But you'll sure turn a few heads at the airport.

A SUITABLE CASE

Let tech ease your journey. In the first part of a series, we bring you the latest in smart luggage

BY NIDHI SINGAL

Impression Matters

We know it's a pain remembering the combination to your case. But what if you could unlock your luggage with your fingerprint? This check-in luggage from Samsonite can do just that—and the integrated fingerprint lock can memorise up to 20 unique prints—good for the entire family. Plus, it has a TSA Lock, so you're good when you're travelling the globe. Samsonite ensures that the case—a winner of the Red Dot Design Award of 2021—glides well thanks to its Aero-Trac Suspension II wheel system and ball bearings.
