

FOLLOW ON

While going on a trip, there's a lot one needs to hold in one's hand—tickets, ID, passport. It would be nice if you didn't need to pull around your carry-on case as well. This intelligent case follows you around! Equipped with ultra-wide band location technology, it comes with a smart band/bracelet for the user. The autonomous luggage uses ultrasound to detect obstacles, while the Airwheel app connects over Bluetooth and lets you change speed and track its position. The band vibrates and the luggage sounds an alarm if it's out of range. But the battery takes 13 hours to be charged and the case weighs 6 kg when empty.

SMART & BEAUTIFUL

Remember how it feels when you pat down your pockets and don't find your phone? The same dread chills your heart when you're on a business trip with your laptop and suddenly misplace it. Worry not, as this smart business bag comes with an in-built tracking module that allows you to locate it on the accompanying app. Crafted out of premium Italian leather, the bag's in-built GPS allows you to locate your bag in seconds; plus, it comes with an anti-theft alarm. And its "Bag-Bot" separation reminder alarm ensures you don't leave it behind.

Having your Back

Those who love backpacking trips are often dead tired by the day's end. This useful backpack will bring them relief—by massaging their back while they carry the bag. The backpack houses two sets of massagers that can be powered by a power bank (10,000 mAh and above recommended). Designed to alleviate pain, rejuvenate and relax the back and shoulder muscles, the massagers can be adjusted to perfectly place them on your upper and lower backs. The bag can hold up to 17-inch laptops.
