

Welcome to the world of advanced AI engineering!!

The University of Engineering and Management (UEM) in Jaipur is a leading institution that specializes in advanced education and research in the field of Artificial Intelligence (AI), along with offering programs in B.Tech, M.Tech, and MBA with a focus on Robotics

What makes Automobile Engineering at UEM a coveted choice is its attractive program that emphasizes on hands-on experience and practical learning. Students have access to state-of-the-art laboratories and

workshops where they can apply their theoretical knowledge to real-world situations. From engine testing to vehicle dynamics simulation, the facilities at UEM enable students to gain practical skills that will set them apart in the industry.

UEM Jaipur is recognized for its excellence in technological education and provides students with a comprehensive understanding of AI and its various applications. The university offers specialized courses that cover a wide range of AI topics, including machine learning, natural language processing, computer vision, robotics, and intelligent systems

The B.Tech program in AI at UEM Jaipur equips students with a strong foundation in computer science and AI, focusing on core concepts and programming skills. Students receive hands-on training through practical projects and industry internships, enabling them to apply their knowledge to real-world scenarios

In addition to the academic curriculum, UEM Jaipur also organizes workshops, seminars, and guest lectures by experts from academia and industry to keep students updated with the latest advancements in AI and Robotics

Bringing in a unique skill set to the automobile industry are MBA students. With their comprehensive knowledge of business strategies, financial management, marketing, operations, and leadership expertise. Their ability to analyse market trends, develop strategic plans, and make informed decisions, MBA graduates play a vital role in driving business development and ensuring organizational efficiency in the automotive industry.
