THE TRICKLE-DOWN EFFECT

Features that were earlier exclusive to premium cars may become mainstays in the mass market segment soon, thanks to the diffusion of technology

WHAT WAS SCIENCE fiction of yore is flagship tech of today. And what is flagship tech today will become accessible to a larger set of consumers tomorrow. That, in a nutshell, is the democratisation of technology, which takes place for reasons such as economies of scale, lower prices, innovation and greater demand.

86 | A sterling example is the iPhone. Before 2020, only the line-up's flagship Pro models sported OLED displays; the non-Pro models had to make do with IPS LCD displays. But come 2020, all iPhones in the line-up were provided with OLED displays.

The story is similar in the automotive space, where some features available in premium cars now could well be available in more mass-market variants in the future. Here is our pick of four such features:

ADVANCED DRIVER ASSISTANCE SYSTEMS (ADAS)

This is a feature that's already available in several cars in India like the Mahindra XUV700, the Honda City or the MG Hector. As this tech evolves, features like adaptive cruise control, lane keep assist, automatic emergency braking and blind spot monitoring could truly save lives.
