

GEAR-ING UP FOR SUCCESS

BY NIDHI SINGAL

While most students now work on laptops during their financial/accounting classes, a financial calculator can often be a life-saver. Specifically designed to perform complex financial calculations quickly and accurately, this calculator saves time and effort in calculating complicated financial equations. Plus, some MBA programmes require students to take standardised examinations such as GMAT or CFA, where often the use of specific financial calculators, such as the Texas Instruments BA II Plus, is permitted. Sometimes, it is cool to be old school.

When the course teaches you to collaborate, it is a given that you would be doing so with your peers. But what if your state-of-the-art laptop, with its limited ports, throws a spanner in the works? To navigate such tricky matters, you should get this accessory. With multiple ports to connect USB flash drives, external hard drives, smartphones, and other peripherals, simultaneously, this device is sure to get rid of any of your connection concerns. With a plethora of connectivity options, built-in card reader and Ethernet port, this adaptor will help you collaborate anywhere, with anyone.

This calculator can be your best buddy during exams

If you're a management student, you're often doing extensive reading and research and working on projects and presentations. This means you may need to print out articles, case studies, reports, etc., regularly. Having a personal printer makes sense—one that's hassle-free and compact. This printer from HP fits the bill—it's wireless and

compact. Plus, since it features an ink tank, instead of replacing cartridges, you just need to top-up the ink. Besides this, the HP Smart app allows you to quickly scan images and documents—even on your phone—and print with a single command.
