

INDIA'S TECHADE OF SKILLS AND PEOPLE

(From left) **Sourav Majumdar**, Editor, *Business Today*, with **N.R. Narayana Murthy**, Founder, Infosys

» Touching upon the utility of AI in the Indian context, N.R. Narayana Murthy said that it can be deployed to improve public governance, reduce corruption, and improve water availability and agricultural productivity, among other things

» He also emphasised upon

the importance of young entrepreneurs accepting and correcting their mistakes in the best interest of all stakeholders

» Murthy said merit and values strengthen investors' trust in the management to provide good growth in top- and bottom lines

TRANSFORMING INDUSTRIES & SOCIETY WITH AI

(From left) **Aayush Ailawadi**, Technology Editor, *Business Today* TV, with **Romesh Wadhvani**, Founder and Chairman, SAIGroup, joining via video link

» Romesh Wadhvani said that India cannot become one of the top three AI players by accident and it would require national-scale initiatives to get there

» He added that India's massive IT talent pool needs to be focussed towards AI initiatives as currently that talent is

not being fully utilised compared to the opportunities provided by AI

» He said that just as Aadhaar and UPI have played big roles in India's progress, there is a need to use AI to transform the nation, adding that the government should plan and implement this

AI'S TROUBLING INTELLIGENCE
