

» Expounding on the need to keep a watch on the data that AI models are learning from, Kanishk Gaur said that global standards need to be developed that take care of user privacy, ethics, and which also prevent harm

» Jaideep Kewalramani said one should embrace AI tools for innovation and not for plagiarism or to infringe on others'

intellectual property as the changing scenario will need AI-augmented humans who know how to use AI effectively

» Explaining how the government has learnt from its work on developing digital public goods such as UPI and Aadhaar, Vinayak Godse said that the government will bring the same expertise and learning as AI evolves

» Muralikrishnan B. said that telecom service providers and smartphone manufacturers are still looking for unique use cases of 5G technology, and users will more readily adopt the tech if they are developed in India

» Manoj Gurnani said that 5G also caters to agriculture, transportation, healthcare, etc., differentiating it from

older technologies

» Mohan Rao Goli said that the download use-case of 5G will convert into streaming as huge bandwidth is available with larger throughputs

» Harmanpreet Dhillon said that with internet penetration increasing in rural areas, 5G can help people residing in villages in many ways

NEXT-GENERATION SECURITY PLAYBOOK

(From left) **Priyanka Chaturvedi**, Member of Parliament (Shiv Sena), Rajya Sabha

Tejasvi Surya, Member of Parliament (BJP), Lok Sabha

Rajeev Gowda, Former Member of Parliament (Congress), Rajya Sabha

» Priyanka Chaturvedi said that a neutral framework is required to utilise the rich and diverse repository of data available in India

» Tejasvi Surya said that the proposed Digital Personal Data Protection Bill, 2022, will give primacy to individuals, his privacy, allow space for new start-ups, think tanks and data fiduciaries to process data lawfully

» Rajeev Gowda stressed that there needs to be a neutral fact-checking agency when there is so much talk of governments spreading misinformation for their own benefit

CATCHING A COLD DURING THE TECH WINTER

(From left) **Siddharth Pai**, Founding Partner, 3one4 Capital

Srinivas Rao Mahankali, Chief Executive Officer, T-Hub

Anas Rahman Junaid, Founder & Managing Director, Hurun India

» Siddharth Pai said that the macro factor of market sentiments has severely affected the start-up ecosystem, and the ventures that come out of it will be far more resilient

» Srinivas Rao Mahankali said that the best way for start-ups to weather the storm is to get their unit economics in place

and figure out if there is a path to profitability

» Anas Rahman Junaid said the fear of missing out in signing a deal is not there anymore, with investors taking the time to do their due diligence and even backing out if the deal is not good. Now, there is better awareness about how to price innovation, he added
