

MG thinks future nurtures 22 Colleges

Morris Garages, carries a rich legacy of 99 years with a never-say-die attitude, innovation, and a gentleman's graciousness when serving a loyal clientele across continents and still counting. MG's core philosophy ensures to add value in the communities and countries where they have presence. In India, the global automobile giant has launched several community service initiatives under MG Sewa. MG Nuture for up-skilling the student community is aimed at making them industry ready for accelerating the economic goals of India.

As a responsive and responsible member of India's industry, MG Motor India (MGI) advocates the cause of socio-economic development in community that it is present in while working committedly to strengthen the automotive sector in every possible way. Realising the immense potential of the country, which has one of the largest youth population in the world, MG Motor has launched MG Nuture, an empowerment program aimed at unleashing the talent of young minds through training and skilling, thereby, help bridge the existing 'industry-academia' gap and making them employable.

MG Nuture is a holistic skill development program conducted in close association with the technical institutes including the 'Campus to Corporate' program to hone their soft skills and make them futuristic. Emphasis is on enhancing their analytical skills, problem-solving skills, and even soft skills, where MGI experts conduct basic and advanced technology-related sessions. The company had forged collaborative ties with College Dekho for 200 students from MBA, UG and PG in B.Com, B.Sc, BTech, background, which is a paid internship program across 79 cities.

Skilling Students for Industry

To bridge the gap between the industry and academia, MGI equipped colleges with over 13 connected cars/EVs across Gujarat, NCR, Punjab and Karnataka to support advanced learning of students, including interaction with business leaders/MGI experts at regular intervals. Even an EV learning course was introduced with RV College of Engineering, Bengaluru. 'MG-RVCE Nuture Program on EV' is a specialized diploma program on EV and advanced technologies (IoT, connected cars). This program

particularly focuses on offering scholarship for high potential female candidates. In future, more such EV courses would be introduced in select colleges. Paving a path for easy transition from campus to corporate, the students will be trained in soft-skills over two semesters to make them professional savvy. The program works towards a better quality of workforce, particularly for India's burgeoning automotive sector and in doing so help firmly put India 2.0 on the fast track to growth.
