

HARNESSING GROWTH IN HEALTH CARE

Dr Usha Manjunath
Prof. & Director, IHMR Bangalore

India is focused and giving priority to the health and wellness and focused on health. As health is the important concept for every individual to focus on healthcare delivery system. The Healthcare has become the most important element in terms of revenue and employment for the economy of the country. The Indian healthcare sector is growing at a fast pace due to its strengthening coverage, services, and increasing expenditure by public as well private players in the community of the nation. To deliver the driven by innovation and technology,

especially to focus on healthcare industry has been taking big leaps. The changing consumer preferences, health seeking behaviour and growing comfort with technology is radically disrupting the health care business ecosystem and demanding for new age managers with an integrative perspective towards hospital business.

In Today's progressive organisation we have to seek employees to be updated about the latest trends and technologies, equipped with business acumen abilities to critically identify, analyse and monetize the growth opportunities with informed decision in the health care sector. The health sector is growing in the fast growing to develop the nation in bring the transformation in the health care sector.

The traditional management skills and knowledge would not suffice the demands of the emerging breed of modern healthcare enterprises. The deeper command on finance, operations, quality, marketing, people management entrepreneurship and digital health care and innovative skills to implement is the way forward for the "Healthcare Management. The IHMR is a organisation focused and developing towards the digital and developing advance technology towards healthcare services in Academics, Research, Training and Development

and Consultancy. The organisation is growing and supporting in implementing practical way of initiating and activating new business models, emerging management practices, digital technologies like chatbots, machine learning apps, IoMT along skills to use and integrate them effectively and safely in the healthcare management practice to achieve operational and financial efficiency is the new success measure of the business in the new era.

IHMR Bangalore is reimagining the healthcare management to educate and promote and support the organisation. They have crafted a new paradigm of educational curriculum.
