

RARY DIP

VERTICAL LIFT

- Shortage of passenger aircraft globally is forcing airlines to scramble to lease new planes to deploy additional capacity
- Despite corrections, ATF or jet fuel prices remain high. The operational cost of Indian carriers has also gone up after they retracted salary cuts
- The suspension of flights by Go First has also contributed to increasing airfares
- Airlines choosing to operate fewer flights than permitted under DGCA's summer schedule has made the problem worse
- All these factors have resulted in average airfares rising by 30 per cent in the past few months

**UNLESS SOME SYSTEMIC ISSUES ARE ADDRESSED, EVEN AS
GHT OF THE APPROACHING FESTIVE SEASON**
