Mastering Business Artistry: The Art & Craft of an MBA

(From left) **Aayush Ailawadi**,
Technology Editor and Presenter,
BT TV, with

Ashwin Sanghi, Author

Ashwin Sanghi said apprehensions of artificial intelligence (AI) and tech disruption were not new. He drew parallels with Google and Wikipedia, which initially raised concerns but ultimately became invaluable for research

He said he has used ChatGPT a lot, and tools like these enhance work, and they did not represent a challenge. He added that it was crucial to remember that the human touch remained irreplaceable

Sanghi added that emotions, experiences, and insights, which only humans can bring to storytelling, are what resonate deeply with readers, and AI cannot replicate this

B

BRINGING TOGETHER THE best minds in corporate and academia to deliberate upon skill sets necessary for future business leaders and the evolving nature of management education, the **BT Best B-schools & HR Summit**, held at Delhi's ITC Maurya on June 23, also saw discussions on several other issues.

The proceedings kicked off with businessman-turned-author Ashwin Sanghi decoding how students can master the art of doing business. Next, a discussion with Rajeev Chandrasekhar, Minister of State of Electronics and IT, and Skill Development and Entrepreneurship, revolved around the road map needed to impart necessary skills in the backdrop of the government's focus on developing a semiconductor ecosystem.

Shedding light on how a B-school education can become a great enabler, Pramath Raj Sinha, Founding Dean of ISB and Founder & Chairman of Harappa Education, said that now students constantly need technical and functional training to keep pace with the evolving world. The event also saw sessions with Bharat Bhasker, Director, IIMA; Bhaskar Chakrabarti, Dean-Academics, IIMC; Varun Nagaraj, Dean, SPJIMR; and Ashutosh Gupta, Country Manager-India, LinkedIn, among others, who discussed a range of issues.
