

Innovations in AirCons Lead Market Demand

Innovation is the key that ensures to meet the evolving needs of society. Product brands catering across the consumer sector are breaking away from the stereotypes to incorporate features that support sustainability. Add to it the demands of the 'new normal' that has triggered the race for superior technology, easy to use functional features and most important are budget friendly. The air-conditioning sector is one such segment of the cooling industry that has made significant progress tackling demand, durability and design. Most importantly they are green. Let us have a look at some of the popular aircon brands of India and why is it so.

Daikin

At Daikin, emphasis is on 'innovation for change' that not only makes life comfortable in the sweltering summer heat that grips the sub-continent, but also plays a key role in transforming lives with its new patented technology like streamer discharge that protects indoor air from different pathogens, or voice-assistant compatibility for seamless usage even by family members who are not technology savvy. The 3-star energy rated Daikin 0.8 Ton 3-star Split AC model endears to customers because of Stabilizer free operation. The intelligent, sleek and stylish design, sleep mode and swing are some of the salient features of this air conditioner from Daikin.

Panasonic

Panasonic Air conditioning is another forte of this

home appliances and electronics brand, which has made a remarkable and wide impact on the Indian consumer segment. Panasonic 1.5 Ton 5-star Wi-Fi Twin Cool Inverter Split AC that comes with twin cool inverter technology ensures cooler and purer air with its PM 2.5 filter. Multiple feature options in this product makes it ideal for the Indian climate. The brand offers air conditioners that use the latest technology for prices that do not burn a hole in the customer's pockets, a reason why they are highly satisfied with the quality of features and is backed by prompt customer support.

Blue Star

If you are one for stylish features than the latest Blue Star 2 ton 5-star Inverter Split AC fits your standard of aesthetics. The product stands out for its most functional and user-friendly remotes

that helps you to opt between five fan speeds, six cooling modes. Other features that enhances the immersive experience of the customer includes dehumidifier, inverter operation, dust filter, and eco function. Self-diagnosis, silent brushless DC motor and precision cooling technology give more power to the product and is worth the value spent on it.

Cruise

An Indian home appliances brand, Cruise, specializes in HVAC. Cruise air conditioners provide advanced, high-quality air conditioning solutions for residential, commercial and industrial applications. Innovation and introduction of new AC technologies in the market is integral to Cruise strategy. The eco-version of this brand is an energy saver and the cooling is incredible and so it 5 star rated when it comes to performance.
