

CEG LTD : THE INDIAN SUPERPOWER IN ENGINEERING CONSULTANCY

A man with a vision builds empires, they say. Vishwas Jain is a living testimony to it. A firm that he started just after his graduation is now a huge organization catering to the diverse needs of customers spread across the globe.

Vishwas Jain's dream run started just after his graduation. True to his name, his capital was just faith and self confidence.

A Civil Engineer by profession, Vishwas Jain is a first-generation entrepreneur who is now acknowledged as a top infrastructure expert in India. Emerging from a very humble background, Jain established the Consulting Engineers Group in 1984 and has steered it to become one of the largest Indian owned infrastructure consultancy company providing services for metros, railways, high speed train, highways, urban development, tunnels, etc.

Consulting Engineers Group Ltd. (CEG) is now an international organization offering a spectrum of engineering consultancy solutions in infrastructure development and management for a plethora of projects including highways, expressways, railways, metros, airports, water resources and urban development. The company is known for its expertise in designing, construction supervision, operation and maintenance, and asset monetization. Their services include feasibility studies, design, general consultancy, project management, material testing, geotechnical investigations, safety audits, transaction advisory, and asset management.

CEG has executed projects in Bangladesh, Australia, UK, Ghana, Liberia, Ethiopia, Tanzania, Uganda, Zambia, Kazakhstan, Uzbekistan, Tajikistan, Gabon, Nepal, Maldives, Kenya, and Uzbekistan. The company has a multidisciplinary team of over 1500 professionals from 52 offices globally, with a singular aim of shaping the vision of their clients into reality.

The company is the professional partner of choice for critical projects like the Mumbai Ahmedabad Bullet Train project, the Eastern Peripheral Expressway, Dwarka Expressway, Nagpur Mumbai Super Expressway in India. It has also been mandated to prepare the Road and Bridge Design Standards in Kenya and Mozambique, The Metro Projects in Mumbai, Chennai, Nagpur, Pune, Surat, Patna, Bangalore and Navi Mumbai are also a part of its

portfolio. In addition, CEG is also actively engaged in providing services for infrastructure projects funded by the World Bank, Asian Development Bank, JICA, Exim Bank of India, etc.

CEG's operations are based on three core principles; Ethics, Integrity, and Timely Delivery. They work on the motto of accelerating the development of any project by engineering the client's vision.

As a result, CEG has been a debt-free and profit-making company since inception.

In these 35 years CEG has notched up quite a few records, that stand witness to its domain expertise. They have played a role in building 30000 kms of roads and 1000 km of rail network. They are associated with over 250 km of metro being built.

Jain has founded one of the most high-end testing and investigation laboratories in the country called CEG Test House And Research Center Pvt. Ltd. (NABL accredited as per ISO/ IEC 17025:2005 and BIS recognized) providing quality testing services for geotechnical investigations, environment,

building & construction material, non-destructive testing etc. CEG is continuously investing in digital technology resources to enhance its in-house capabilities. They have pruned the cost of production while increasing efficiencies using customized software for different modules like Business Development, HRMS, project monitoring, Finance & accounts. They have developed a 3-layer project monitoring and coordination system that has won the confidence of clients.

An out and out family man, Jain is ably assisted by his wife, Dr Renu Jain who is the Managing Director, CEG Test House and Research Center Pvt Ltd. His two daughters have done Civil Engineering and Management from UK and are working with the firm.

The vision ahead surely does look bright.

Some of CEG's illustrious achievements under the leadership of Mr. Jain are as follows:
