

6 FACTORS THAT DECIDE

35-40%

PAYMENT HISTORY

Payment history is the most important factor when calculating the credit score. Even a single missed or delayed payment can cause your credit score to drop

20-25%

CREDIT UTILISATION

It is an indicator of the credit limit used up by you, and is calculated by dividing your credit usage by your overall credit limit. You should ideally avoid using more than 30 per cent of your available limit

15-20%

CREDIT MIX

It is good to have a 'mix' of credit as it shows your ability to manage different types of credit products
