

Building wealth is a marathon, not a sprint.

That's why we've brought the disciplined recurring investment approach of other asset classes to crypto assets.

Advantages of a Disciplined Regular Investment Strategy

Rupee Cost Averaging

A feature like CIP helps you average out crypto buying prices in volatile markets by investing a small fixed amount (as low as ₹200) every week.

Compounding

CIP helps you build wealth over the long-term by reinvesting your profits thereby leveraging the power of compounding.

Convenience

Your investments stay on auto-pilot. So even if you're busy, once you set your CIP, your investments are automated!

No Lock in Period

Wanna change your investment strategy or create a new CIP? Cancel CIPs at anytime with zero cancellation charges.

**Choose coins
& weekly amount**

**Add funds
to wallet**

**Start investing
with CIP**
