

THE SHARING ECONOMY

While Netflix is trying to fix password-sharing among subscribers to boost its revenues, Indian OTT players may also have to start looking at this rampant practice. After all, at 40 million, only a tenth of the OTT viewership actually pays for the services. But there's a risk of driving away users by making it too hard to share an account. How to strike the right balance? It's WIP, silly.

Hop, Skip and Jump

AT LEAST ONE-FIFTH of the country's IT workforce has been walking in and out of jobs as attrition at the tech majors is at an all-time high of 20 per cent-plus. The 12-month attrition numbers have been rising steadily, taking a toll on companies' margins. At 27.7 per cent, the second largest IT firm Infosys witnessed the highest attrition among peers. Leader Tata Consultancy Services reported industry-best numbers of 17.4 per cent, but it was still a record-high figure for the company. This is set to go on for a few more quarters as the war for technology talent continues. The good part? Jobs are available for the right skills.

SAME LOAN, MORE EMI

Monthly instalments for home loans are set to rise with an increase in the repo and CRR rate by the RBI in an off-cycle monetary policy meet, citing the jump in inflation. Wholesale and consumer inflation surged to highs of 14.5 per cent and 6.95 per cent, respectively, this March. Recently HDFC, SBI, Bank of Baroda and Axis Bank raised their benchmark lending rates, leading to an increase in home loan rates for existing customers.

NO FREE RUN

In a move that is seen as part of the government's efforts to curtail the dominance of US retail giants Amazon and Walmart in India's e-commerce market, the Competition Commission of India (CCI) conducted search-and-seizure operations at the offices of top sellers on e-commerce marketplaces over complaints of alleged anti-competitive practices. Raids were conducted in Delhi and Bengaluru in relation to an investigation launched by the CCI in January 2020.

VAX FOR FREE?

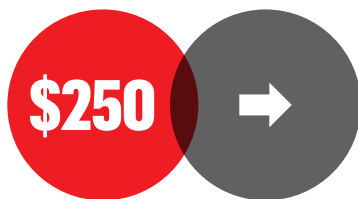

Covid-19 vaccine makers and private sector healthcare providers are stockpiling jabs that are about to expire. With adult India largely vaccinated, Covid-19 vaccine stocks are not flying off the shelves any more. Adar Poonawalla, CEO of Serum Institute of India, recently urged the government to reduce the gap between

booster doses from nine months to six months to increase their usage, and also slashed the price of Covishield from ₹600 to ₹225. Association of Healthcare Providers (India) has said that private vaccination centres are either discarding expired jabs or are ready to provide vaccines free of cost.
