

WHY CRYPTO EXCHANGES ARE FUNDAMENTAL TO THE SUCCESS OF THE METAVERSE

Since its surge onto the mainstream, the metaverse has generated buzz and business in the world of technology, lifestyle, art and entertainment. Created by new-age entrepreneurs leveraging a gamut of emerging technologies from blockchain, digital assets, virtual reality (VR) and augmented reality (AR), the metaverse market was already worth US\$58.5 billion in 2021 and is slated to grow by nearly 13 times over the next five years.

The metaverse is redefining life as we know it, replicating real-life objects, beings and experiences onto a virtual environment to create a thriving alternate reality. While most have been transfixed by the novelty of experiencing the duality of a digi-physical world, the true potential of the metaverse lies in the power to transfer value between platforms and across geographies,

instantaneously. All these are underpinned by crypto, the digital asset that will power the economy of the metaverse.

The metaverse is a new phenomenon with old roots – a concept that has been around for nearly three decades. Popularised by companies like Meta, the company formerly known as Facebook, as well as its Big Tech counterparts, the metaverse is now
