

■ Manish Walia

Head - Automation South Asia
Delta Electronics

We spoke with **Mr. Manish Walia, Head Automation South Asia (India, Bangladesh, Sri Lanka, Nepal)** at **Delta Electronics** to understand how automation is helping Indian manufacturing deliver on the world stage.

We are witnessing a special moment as the Indian industry strides towards the stratosphere. The "Made in India" tag is gaining global trust and respectability, making it the fastest-growing economy in the world and a popular global investment and manufacturing hub. Automation is a key driver of this change.

Delta Electronics India, which recently completed 15 years in India, has achieved recognition in the Indian automation landscape. Delta Automation has consistently been at the forefront of innovation and excellence, offering cutting-edge solutions that have revolutionized manufacturing processes. Over the past 15 years, Delta's industrial automation business in India has shown remarkable growth, solidifying trust among customers, suppliers, and channel partners alike. "The Indian industrial automation market is experiencing rapid growth, and we are strategically positioned to harness this momentum," stated **Mr. Manish Walia**. "Our

comprehensive range of products and solutions is tailored to meet our customers' evolving needs, and we remain committed to delivering unparalleled support to them."

Delta Electronics India offers a diverse automation product range and industry-wide applications for its complete Industrial & Building Automation solutions. He explains "Automation propels capability, competence, and productivity; it creates more reliability and improves precision, standardization, and quality, which are key to competing globally."
