the tournament, is ensuring that travellers looking to catch a match can book sustainable stays. Santosh Kumar, Country Manager for India, Sri Lanka, the Maldives and Indonesia at Booking.com, says, “Our travel sustainable badge will help provide the necessary information to travellers who wish to make sustainable travel choices for the ICC Men’s Cricket World Cup. Currently, we have over 20,000 properties in India that are being recognised for their sustainability efforts.” Queries sent to other partners like BIRA 91, MRF, Byju’s, BharatPe, Nissan, Oppo and Aramco went unanswered.

The BCCI did not respond to *Business Today*’s queries. But, during this year’s IPL, it launched a “Go Green” campaign in which it would plant 500 trees for every dot ball bowled in the playoff round. Separately, on September 29, BCCI Secretary Jay Shah posted on X, “We’ve partnered with @TataCompanies in an eco-friendly endeavour to plant 147,000 saplings. The symbolic 100,000th sapling found its home at the iconic Narendra Modi Stadium, embodying our commitment to giving back to Mother Earth.”

CATCH 22

The Cup comes at an interesting time for India. In recent times, India has taken the lead in matters concerning sustainability. In 2014, it became the first country to mandate Corporate Social Responsibility (CSR) for companies,

which stipulates that businesses allocate a minimum of 2 per cent of their net profits towards societal concerns like poverty alleviation, gender equality and environmental protection.

Following up on that, in May 2021, the Securities and Exchange Board of India introduced the Business Responsibility and Sustainability Reporting framework that requires the top 1,000 listed entities by market capitalisation to report on sustainability-related aspects in their annual financial report submitted to Sebi from financial year 2022–23 (FY23). Later that year, Prime Minister Narendra Modi set the marker during the COP26 conference in Glasgow
