

TOP BRASS

Designer Vikram Goyal has an unusual relationship with brass. He sees it as a sheet of dense fabric that can be cut, hammered, or pressed into audacious designs. In October, the engineer-turned-designer showcased his

work at the prestigious PAD contemporary art and design fair in London. The designer's "pad" in India is a sprawling industrial space of museum-like proportions in Noida, where he fashions and displays his oeuvre.

Amidst a medley of giant asymmetrical modernist sculptural forms and massive *repoussage* metal canvasses with mythical landscapes pressed onto them, lies '*Radiate*', a set of three brass screens—nine ft high and
