

VACHERON CONSTANTIN MÉTIER D'ART TRIBUTE TO EXPLORER NATURALISTS

► **Inspired by** the scientific discoveries of the naturalists who travelled the world's oceans aboard the English ship Beagle in the early 1830s, the 'Métiers d'Art Tribute to Explorer Naturalists' is a collection of four 10-piece limited edition watches in pink and white gold. Each 41 mm case blends the talents of the master engraver and the master enameller to craft a watch powered by the self-winding in-house Calibre 1120 AT/1. It comes paired with an alligator strap. Price on request.
